-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --
Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Art Unit: 1714

1. The amendment of 6/11/07 has been entered. Claims 1-9, 15, 17-19, and 22-24 are pending.

2. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

3. Claims 1-9, 18-19, and 22-24 are rejected under 35 U.S.C. 103(a) as being unpatentable over US Pat. No. 5270434 Tetart et al. in view of US Pat. No. 6395819 Espiard et al. and WO 01/23655 Zeng et al..

Tetart discloses the instantly claimed sizing composition and insulation products made therefrom. It is noted that the excess of formaldehyde of Tetart, column 6, lines 41-44 falls within the scope of the instantly claimed crosslinking agent of claims 1, 18, 19 according to page 7 line 25 of the instant specification with the "gel" reference of column 6, lines 44-48 indicating that crosslinking actually occurs during sizing. See the abstract; column 1, lines 1-68, particularly 12-15, 20-22, and 25-44 of which 38-44 indicates crosslinking of the size; column 2, lines 1-68, particularly 10-13; column 3, lines 1-68, particularly 44-68; column 4, lines 1-68, particularly 1-2 which fall within the scope of the instantly claimed aminoalcohols of claims 1, 3, 5, lines 3-19; column 6, lines 1-68, particularly 33-44; and the remainder of the document. "Comprising" of the instant claims encompasses extra steps and/or ingredients of the references.

The patentee is silent regarding the specific structure of the disclosed "insulating products" of column 6, line 36. Since the instant applicant is a coinventor of the Tetart et al. patent, the examiner asks for information regarding what these "insulating products" were intended to be in terms of their structure. In other words were the structures of these "insulating products"

Art Unit: 1714

intended to be the same as the structures of the insulating products of the instant claims? See 37 CFR 1.56.

It would have been obvious to one of ordinary skill in the art at the time of the instantly claimed invention to use the instantly claimed sizing composition on insulating products having the instantly claimed structures because such structures are known as taught by Espiard et al., abstract; column 8, lines 32-39, which includes the instantly claimed densities of claim 1 and Zeng et al., abstract, Figure 1, page 4, lines 7-11 of which the scrim is taken as falling within the scope of the tissue mat of article number 3 of claim 1, these articles may be of sized fibers and they would have been expected to benefit from the properties of the sizing of Tetart et al. for the reasons disclosed in Tetart et al. in its entirety.

4. Claim 15 is allowable for reasons of record.

Claim 17 is objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims. The prior art of record does not disclose the instantly claimed invention nor provide rationale for using the limitations of claim 17.

5. Any inquiry concerning this communication or earlier communications from the examiner should be directed to Patrick D. Niland whose telephone number is 571-272-1121. The examiner can normally be reached on Monday to Thursday from 10 to 5.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Vasu Jagannathan, can be reached on 571-272-1119. The fax phone number for the organization where this application or proceeding is assigned is 571-273-8300.
